United States

Dear Dr. Toll,

Your paper “Assessing population-level effects of zinc exposure to brown trout (*Salmo trutta*) in the Arkansas River at Leadville, CO” has received an *Integrated Environmental Assessment and Management* Best Paper Award 2013 Honorable Mention.

Each year, *IEAM* Editors and the Society of Environmental Toxicology and Chemistry (SETAC) Publications Advisory Committee recognize papers published in the previous volume year that most reflect technical innovation and scientific advancement in the fields of environmental science and ecotoxicology. The journal's mission is to provide a peer-reviewed forum for original research and regulatory analyses that bridge the gap between technical research and the use of science in decision making, regulation, and environmental management. Your paper will be highlighted in the July 2014 issue of *IEAM*, and you will receive an official letter of recognition from SETAC.

On behalf of the *IEAM* Editors and the SETAC Publications Advisory Committee, congratulations on your outstanding contribution to the journal and the field of environmental science.

Sincerely,

Richard. J Wenning
SETAC Editor-in-Chief
Integrated Environmental Assessment and Management
